DETAILED ACTION

This communication is in response to the documents dated 2/13/04. Claims 1-15 are pending in the application. Claims 1, 12-15 are independent claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kato et al. (US 20050019007), and further in view of Ho Yuen et al. (US 20020129036).

As per claim 1, Kato et al. teach:

a navigation area storing an information file including a first playback indicator, the first playback indicator identifying a navigation command field for execution at first playback of the recording medium – paragraphs 0010-0019, 0031, 0186-0188, 0193-0197, 0222-0223.

the navigation area further storing the identified navigation command field, the identified navigation command field including at least one navigation command – pars. 0206, 0409-0410, 0537-0538. However, Ho Yuen Lok et al. further teaches the a navigation

area with a navigation command by teaching system and method for storing and manipulating multi-media – the title; the a navigation area with a navigation command – pars. 0004, 0052, 0082, 0087-0090, 0094-0099 (the Browse mode appears on the GUI. This page provides an interface to the system so that the user may access the various functions available, like the front panel of a CD player. In this window, the user is offered the choice of a variety of available playback sources. The sources in this embodiment are either, or all of, the following: "CD-<CD TITLE>", "All Songs", "Audio Albums", "Photo Albums", "Playlists"). Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Kato et al.'s teaching and Ho Yuen et al.'s teaching in order to allow users to have accesses to playlists or albums of songs in order to play songs in their desired ways. Ho Yuen et al.

As per claim 2, Kato et al. teach:

wherein the first playback indicator includes a name for the identified navigation command field – pars. 0032, 0191, 0298, 0636, 0654.

As per claim 3, Kato et al. teach:

wherein the first playback is when the recording medium is first read – pars. 0007, 0022.

As per claim 4, Kato et al. teach:

wherein the identified navigation command field includes a navigation command for launching a playlist – pars. 0027, 0191, 0221-0222, fig. 9.

As per claim 5, Kato et al. teach:

wherein the playlist includes navigation information for reproducing at least a portion of a clip file – pars. 0011, 0017, 0022, 0027-0031.

As per claim 6, Kato et al. teach:

wherein the information file is stored in main directory, which is a sub-directory of a root directory for the recording medium – par. 0252.

As per claim 7, Kato et al. teach:

wherein the first playback is when the recording medium is first read – pars. 0192-0199.

As per claim 8, Kato et al. teach:

wherein the main directory further includes a playlist directory storing at least one playlist, a clip information file directory storing at least one clip information file and a stream directory storing at least one clip file – fig. 14, pars. 0260, 0431.

As per claim 9, Kato et al. teach:

wherein the first playback indicator includes a name for the identified navigation command field - pars. 0032, 0191, 0298, 0636, 0654.

As per claim 10, Kato et al. teach:

wherein the identified navigation command field includes a navigation command for launching the playlist in the playlist directory – pars. 0191, 0594.

As per claim 11, Kato et al. teach:

wherein the playlist includes navigation information for reproducing at least a portion of the clip file in the stream directory – pars. 0190-0199, 0409.

Claims 12-15 claim the same subject matter as of previous claims and are rejected based on the same ground of rejection.
